Mr. Dragan Armansky
Milton Security
83GF+9H
Stockholm, Sweden 104 65

Greetings ,

Please accept my enclosed application for the Hacking and Spying position at Milton Security. As a Underground Computer Hacker at Wasp Enterprises, I spent five years honing my sql skills and linux/unix skills. Your job posting specified the following qualifications:

- Ability to hack into email servers, home security systems, online bank accounts, credit cards, and pretty much anything that someone wouldn't want you to have access to.

- Be able to achieve the first requirement without leaving the smallest hint of a trail.

As you can see from my enclosed resume, I have the following experience:

- I hacked into your bank account one hour ago. Thanks for the coffee and sandwiches.

- Oops, I guess I just left a trail.

Given these requirements, I am certain that I have the necessary skills to successfully do the job adeptly and perform above expectations.

After reviewing my enclosed resume, Github repository, and LinkedIn profile (please see above) I believe you will find I have the qualities you are looking for. I look forward to discussing the opportunity, and will follow up with you in the near future.

Many thanks,
Lisbeth Salander
