Experience

Acme Land Projects International Seattle, WA

Sr. Project Manager 2013 - Present

Acme Land Projects is a project management consultancy that specializes in land use projects from housing developments to land conservation. Acme Land works extensively across the country with both private and government

- Experience managing multiple disciplines (surveyors, architects, geologists, wetland biologists, arborists, and structural engineer) keeping all parties working toward the common goal and providing deliverables consistently on time.
- Prepare documents to obtain ***SEPA approval***, Preliminary and Final Plat approval, right-of-way dedication, boundary line adjustment, and building permits.
- I have a track record of the submittal packages being approved ***97%*** of the time on the first submittal. This saves time delays and additional costs at the beginning of the project which gives the project a greater chance of being completed on time.
- Experience negotiating with opposition groups such as neighboring property owners, conservation and city council groups and producing an outcome that is beneficial to the developer.
- Network with contractors, developers and builder groups to develop new business leads. In the last ***2 years***, have been responsible for bringing in 5 new projects the company bid on and ***2 new clients*** overall in the private sector.
- Promoted from Project Manager to Sr. Project Manager based on industry knowledge and respect from peers within the company and relationships within the industry.

Apex Associates Seattle, WA

Project Manager 2009 - 2013

Apex Associates is a land development consulting firm. Apex offers services in Civil Engineering, Survey, Planning, and Architecture.

- Directed planning, budgeting, vendor selection and quality assurance efforts on projects ranging from **$30,000 to $100,000** and up to **4 months**. All of these projects were completed on time and under budget.
- Prepared Technical Information Reports and Storm Drainage Reports for the bid process. These same reports are then translated into layman's terms for the client so they understand the precautions, hazards Apex and contractors would recognize to minimize the impact.
- Implemented cutting edge ***Low Impact Development*** (LID) designs when LID was new to the industry. This was not just a selling feature when going to bid, but for targeted projects Apex was able to outbid competing bids based on projected results and impact on the environment.
- Developed lot layouts which yielded a highly marketable product while minimizing construction costs. In some cases,d we were able to increase sq. footage per lot by ***10%*** and reduce construction costs by ***5%*** while shortening build cycles.

Evergreen Engineering

Bellevue, WA

Intern 2008 - 2008 (0.4 years)

Evergreen Engineering is a Civil Engineering firm specializing in commercial construction. Evergreen specialized in commercial buildings in the immediate vicinity of a local watershed or water source both fresh water and salt.
